

JOSHUA KAHLBAUGH

218-491-4226 | joshk7683@gmail.com | linkedin.com/in/joshkahlbaugh | github.com/JoshK7

US Citizen in Spokane Valley, WA

EDUCATION

University of St. Thomas, St. Paul, MN

B.S. Computer Science, Minor in Data Science

Sep. 2021 – May 2024

GPA: **3.96**

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL, HTML/CSS

Frameworks: Spring, React, React Native, Express.js

Databases: MySQL, CrateDB

Developer Tools: Git, Copilot, Atlassian Bamboo, AWS, Figma

EXPERIENCE

Alarm.com (OpenEye) | *Java, Spring, SQL, CrateDB, TypeScript, React*

June 2025 – Present

Software Engineer

- Designed temporal arm state tracking in **CrateDB** to fix a defect where delayed device events were evaluated against the current arm state, causing false-positive and suppressed alerts.
- Extended **MySQL** and **Java Spring** service architecture to support offline deterrent capabilities (white light, audio playback) across **100K+** recording devices.
- Fixed a production bug truncating customer alert history exports to **7 days**, tracing it through **AWS CloudWatch** logs to a null pointer exception silently swallowed on alerts missing optional metadata.
- Implemented a SAML **SSO** login flow for devices connecting to web services, reducing login times by **25%**.
- Migrated the **React/TypeScript** codebase to TypeScript 7's native compiler, reducing CI typechecking time by **5x**.

SecretLab, LLC | *React Native, REST APIs, Figma*

Nov. 2021 – Dec. 2023

Software Engineer Intern

- Shipped **React Native** features to a production consumer health app paired with an FDA-cleared glucose and ketone monitoring device.
- Built an interactive timeline visualizing glucose and ketone readings alongside daily activity, backed by **RESTful API** endpoints.
- Designed **Figma** prototypes for new app screens ahead of implementation.
- Integrated **React Native** frontend features with backend **REST APIs** across iOS and Android.
- Found and fixed an account creation flow that allowed users to bypass terms of service acceptance, closing a compliance gap in a regulated health product.

PROJECTS

Student Progress Dashboard | *Java, Spring*

May 2024

- Led a team of **5 developers** across **8 sprints** building a Java Spring dashboard tracking student assignment progress.
- Improved backend data retrieval performance by **50%** through query and method optimization.
- Built Chart.js visualizations surfacing per-student GitHub contribution metrics for **200+ students**.
- Implemented **unit tests** to validate proper aggregation of student performance data.
